

Sample Site Plan

Site Plan Sketch

Please draw a sketch of your proposed alterations or construction. In this drawing (drawn to scale) you need to include:

- o An outline of the parcel showing its shape and dimensions.
- o The location and dimensions of all existing structures on the property.
Make sure to note the distance between each structure and the parcel boundaries (setbacks).
- o The location, shape, and dimensions of all driveways, sidewalks, and other impermeable surfaces.
Also note construction material (concrete, asphalt, etc.) and how driveway joins street (curb & gutter, swale, pipe, etc.)
- o The location and dimensions of all proposed alterations, additions, or structures (including driveways/sidewalks).
- o The location and names of any adjacent roadways or streets.
- o Using one or more arrows, show the direction (or directions) of stormwater flow on the parcel (must flow to street, drainage easement, or holding pond).
- o Place an arrow indicating NORTH (labeled "N") on the drawing.
